

A S Enterprises

Foam Machinery Experts

The **Neuflex** foaming line is our latest offering in the field of continuous foam production. It has a robust chassis and is full of high value features, some of which are mentioned below.

- NDOFLEX foaming technology which uses a stationary liquid lay-down system for pouring the foam.
- P MAXX top paper system to achieve square block profile.
- High capacity output - up-to 500kg per minute.
- Fresh Yield up-to 92% per block
- Silicone - Air Mixer for fine cell structure
- Three side conveyor system
- Industrial PC for operation
- Formulation storage and recall
- On-line color and density change
- Foaming data retrieval with printer
- On-line foaming width change
- Available with Low as well as High Pressure Dozing

NEUFLEX FOAM PLANT

DESIGNED FOR HIGHLY DEMANDING
APPLICATIONS AND LARGE VOLUMES

INDIA'S PIONEERS IN THE FIELD OF FLEXIBLE PU FOAM MACHINERY.
